START

2202

Polling a media device of a computing system for a media change wherein the polling of the media device cannot be blocked by the computing system.

2204

Detecting a media change on the media device.

2206

Generating a media change notification when the media change is detected.

2208

Outputting the media change notification when the media change on the media device is detected wherein the media change notification cannot be blocked by the computing system.
